Heat Transfer Application and Care Instructions

HEAT TRANSFER APPLICATION INSTRUCTIONS:

1. Print at 350 degrees to 375 degrees F for 4 - 6 seconds with 40 lbs. pressure.
2. Remove paper immediately (COOL PEEL) while garment is still on the heattransfer machine.

NOTE:

To insure product performance, transfer should be stored in a dark, dry, dust-free place under 70 degrees F. Wash test recommended before production.

TEST AS NEEDED.

CARE INSTRUCTIONS:

TransferNumbers.com uses quality fabrics and trims to fit and perform well. All printing and numbering processes have been wash tested and utilize proprietary inks and special adhesives to insure durability provided the following care instructions are followed.

- Please follow wash and care instructions to preserve color of fabric and quality of graphics.
- Coaches should print a copy of these instructions and give to all members of the team.
- Wash inside out in cold, hand wash or gentle cycle. **NO BLEACH OR FABRIC SOFTENER.**
- Line Dry.
- **DO NOT DRY CLEAN** - Numbers and Team Names from any provider will be damaged.
- Avoid commercial Dryers in a Laundromat. Temperature Controls are not accurate and excessive heat can damage numbers and graphics from any provider of heat sealed products.
